

May is such a wonderful month. It is packed with many opportunities to enjoy the outdoors with warm weather, fun activities like picking strawberries or listening to a free concert, and recognizing special people.

Our mothers should be praised for nurturing us all and encouraging some to go forward and become the brave men and women that protect our lives and freedom. Some do so abroad in the military while others do so locally in law enforcement. They choose this service for you. Please show appreciation to all on these recognized days.
